Druid

5G SA Launch Pad

Discover what private cellular networks can do for you and your customers

What is it?

This is a 5G launch pad designed to enable customers to demonstrate 5G SA early, to define, test and prepare their 5G solution for the market when gNodeBs are more readily available. Druids products are also made available for lab and trial use as part of the Trial & Innovation service, where you can try out different use cases and get it right in the incubator before launching your new service.

Benefits

Self-contained cellular core that supports 5G SA

Migration path from 4G to 5G

Explore new use cases and capture new revenue streams unlocked by industry digitalization.

What's included?

Network in a Box is preinstalled with 5G Raemis Core, gNodeB and 20 subscribers (with 20 SIM cards):

LAB gNodeB-SA (Network in a Box) Mini-PC
